University R Markdown Template

An attempt to match the core brand assets

Your Name

November 27, 2025

Introduction

This is the template for creating beamer presentations via R Markdown, using the style file (`beamerthemeNewcastleUniversity.sty`) that is based on the PowerPoint template in the University's asset library.

Newcastle University

Basic elements

From Newcastle. For the world.

Bullet points

- **Above cyan line**: short title of the presentation if exists, otherwise the presentation title.
- *Top Right*: logo.
- *Below cyan line*: frame heading.
- `Below red line`: slogan.

Newcastle University

Colours

- We can make custom colours using the `\textcolor` command e.g. red.
- Note that LaTeXcommands are used to make this work.
- See next section on general colour scheme and background colours.

Newcastle University

Equations

$$\pi = 3.14159265...$$

$$e^{i\pi} + 1 = 0 \tag{1}$$

Using references

- We can cite others via bibliography management.
- This means putting the references in a `.bib` file, and using an `@` command when citing.
- Example: Devore, Berk, and Carlton (2021)

Dynamic generation of results using R

From Newcastle. For the world.

Code and Data

```
head(cars)
```

```
##   speed dist
## 1     4    2
## 2     4   10
## 3     7    4
## 4     7   22
## 5     8   16
## 6     9   10
```

Plots

Newcastle University

Features to add / fix

From Newcastle. For the world.

Newcastle University

Pictures

- Fix the issue with the chunk option `fig.cap`

Newcastle University

Colours

- Currently this theme doesn't support blue on white, unlike the PowerPoint template
- This likely requires another style file, or adding an option in the current style file
- Also, it's unlikely to have slides of both colour schemes in a presentation
- Colour of whatever title above cyan line?

Newcastle University

Table of contents

- Currently, adding `toc: true` in the yaml doesn't render the table of contents properly
- There's no such problem for the LaTeXtemplate

Newcastle University

Section heading

- A long section heading will get split into multiple lines
- Subsequent lines doesn't get indented - to be fixed
